SwiftDrop — Contribution Sheet

Group: Minveli_2.0 · **Module:** Enterprise Application Development · **Team size:** nine members

The roster and index numbers come from the November 1 submission. The team responsibilities are cross-referenced against the contribution log and the ownership record. Praveen APE is the submission display name for the member recorded as Eric in the repository.

Member	Index	Team / role
Suthankan B.	234202J	Platform, security and cross-module integration lead
Abhinaya J.	234006L	Courier module — front end
Vibhushan G.	235115D	Courier module — backend; independent security QA
Thuvarahan T.	234210G	Merchant module — backend
Gajanthan S.	234065N	Customer module — front end and service foundations
Pushmitha V.	234214X	Dispatcher/Admin module — front end
Sinthuha N.	234197U	Customer module — backend and Accounts domain
Harithkeshan R.	234077D	Dispatcher/Admin module — backend; report lead
Praveen APE	234163M	Merchant module — front end, webhooks and release QA

Responsibilities and main contributions

Suthankan B. (234202J) — Platform, Security and Cross-Module Integration Lead

- Owned all authentication: Keycloak realm, roles, custom login theme, e-mail verification, optional TOTP, Google identity broker; React OIDC client with PKCE and in-memory tokens; Spring Cloud Gateway JWT validation; shared resource-server security.
- Platform: Protobuf contracts with the team, Docker images, full Docker Compose runtime, GitHub Actions pipeline with security scanning and contract checks, Kubernetes (k3d/K3s) with Helm, monitoring, backups and recovery drills.
- Final phase (November): integration blockers and security/privacy hardening across services; Same Day service tier; admin user controls and gateway enforcement of disabled accounts; AI delivery assistant with Gemini and MCP tools (bonus); dispatcher reassign/unassign; system audits and their remediation; design documentation and submission package.
- Cross-module slices: PDF receipts, webhook retry engine support, proof storage adapter, `deliveryStats` resolver.

Abhinaya J. (234006L) — Courier Module, Front End

- Guarded courier landing page; mobile-friendly assigned-deliveries list; authorised parcel details; stage and notes actions with conflict recovery.
- Backend: courier dashboard GraphQL resolver; policy-gated proof retention cleanup with a hardened transaction.
- Accessibility, session-recovery, monitoring-query and integrated failure-recovery tests.

Vibhushan G. (235115D) — Courier Module, Backend and Independent Security QA

- Independent security tester for the login milestone (36 passed, 0 failed, 4 blocked scenarios).
- Delivery Operations: guarded transitions with append-only history, guarded assignment, transactional outbox with a bounded Kafka relay, proof metadata and endpoints, complete lifecycle transitions.
- Authenticated SSE streaming with REST recovery and multi-replica broadcast over Kafka; webhook egress rotation and replay; multi-actor authorisation regression suite.

Thuvarahan T. (234210G) — Merchant Module, Backend

- Merchant approval state and tenant authorisation provider in Accounts; merchant design diagrams.
- Tenant-bound webhook subscription API; audited admin merchant approval and suspension; tenant-bound merchant booking with idempotency.
- Quote snapshot JSONB mapping, secret-scanner fixes, correlation IDs and bounded metrics, dependency upgrades.

Gajanthan S. (234065N) — Customer Module, Front End and Service Foundations

- Customer steward; OIDC sequence and Accounts ERD review; customer diagrams.
- Protobuf contracts and Java generation; Delivery Operations foundation; Accounts gRPC for courier eligibility, scoped profiles and contact lookup.
- Customer quote and booking screens, dashboard summary cards, authenticated tracking with SSE recovery, public tracking stream; gateway business routes and error handling.

Pushmitha V. (234214X) — Dispatcher/Admin Module, Front End

- Protected dispatcher and admin landing pages; versioned admin zone and rate commands in Pricing.
- Admin merchant review, user and staff management, zone and pricing editor screens.
- `adminDashboard` resolver; daily outcomes reports with reporting-period utilities; capacity benchmarks.

Sinthuha N. (234197U) — Customer Module, Backend and Accounts Domain

- Accounts domain steward; Accounts and Pricing ERDs.
- Delivery booking foundation, customer history and receipts, bounded PDF receipt adapter, authorised parcel reads, gRPC reads for customers/merchants/couriers, recipient authorisation read, secure public tracking.
- Cross-protocol contract regressions, end-to-end booking-to-delivery test, post-rollback consistency verification.

Harithkeshan R. (234077D) — Dispatcher/Admin Module, Backend and Report Lead

- Staff profile read models and controlled provisioning; first academic report draft and contribution matrix.
- Pricing & Zones service bootstrap: Flyway schema, versioned rate domain, expiring quote API with snapshots.
- Read-only GraphQL Query API scaffold, gRPC transport and complexity limits; paginated dispatcher queue with manual assignment; admin reads and staff lifecycle APIs.

Praveen APE (234163M) — Merchant Module, Front End, Webhooks and Release QA

- Merchant landing page with approval state; independent clean-clone setup verification.
- Signed HTTPS webhook attempts with response classification; durable scheduler with exponential retry and exhaustion; owner of the webhook delivery engine.
- `merchantDashboard` resolver and merchant order dashboard/detail; merchant, webhook and operator acceptance tests; release-candidate acceptance and blocker triage.
